### *Reasons for Allowance*

5. Claims 1-68 are allowed.
6. The following is an examiner's statement of reasons for allowance:

This application is for an E-block positioner mechanism.

- **Claims 1,13,20,23,37,41,47,50, and 54** specify an E-block positioner, which requires:

*"... a coil array that couples to the E-block and is positioned near the magnet assembly, the coil array being a generally D-shaped loop including a first segment and a second segment that are adjacent to one another, the first segment being positioned substantially perpendicular to the longitudinal axis of the E-block and adapted to interact with the magnetic field to move the E-block relative to the storage disk, and the second segment being curved where it intersects the longitudinal axis."*

Adjacent being defined as: *always implies absence of anything of the same kind in between.*

Art Unit: 2653

These features, in combination with the other features of Claims 1,13,20,23,37,41,47,50, and 54, are not anticipated by, nor made obvious over, the prior art of record.

- **Claim 57** specify an E-block positioner, which requires:

*“... wherein (i) the electrically excited first portion interacts with the magnetic field to generate a first force and (ii) the electrically excited second portion interacts with the magnetic field to generate a second force...”*

These features, in combination with the other features of Claim 57, are not anticipated by, nor made obvious over, the prior art of record.
